Oxygen Park

The Tripura Government Forest Department build a new park to increase people's interest in natural greenery. The name of the Park will be named as 'Oxygen Park'.

The government has designed the gate of the park as lungs so that tourists can feel the accuracy of the name.

The Park is being built in the dense green area of Shaal Bagan which is 4 km from the main city of Agartala. It is being constructed over an area of 29.6 km hectares.

Continue

The park will be officially inaugurated after the pandemic is under control.

Continue

There are a large number of **Shawl trees**, **colourful orchids** of the **native species of the state** and **shrubs** and various types of **herbs**, **wildflowers** and **medicinal plants**. Besides, there are **various species of birds** and **small species of insects** and **butterflies**.

The government has set up an unique thing to attract the tourists. **QR code** have been installed in every tree in this park. By scanning **these codes** the tourist and general public will be able to find **detailed information about the trees**.

In this park there is a separate place for children and teenagers to play. There are also children's play materials. The authority has also set up separate place for **yoga** and a **walking track** which is **2.4 km long**.

Continue

Portraits of birds and animals found in the forest of the state such as Cormorants, Wild chicken, Pigeons, green pigeons, elephants and bison have made and kept in various places in the park.

Continue

The park also has a **martyr's altar** which name after 'Forest Memorial' and this altar has been built in the memory of all the **employees of the forest department** who **died** in the line of duty to **protect** the **forest** and the **environment** .

It is no doubt that this park will become another **eco – friendly destination** of Tripura.
